

## CO2 Detector

### Features:

- When it detects that the indoor CO2 concentration is above the alarm value, it will send an alarm message to the Smart mobile terminal automatically.
- Adopts high-precision CO2 sensor to collect real-time and accurate data.
- Can work with smart switch, smart sound and light alarm, etc. to switch the customized scene modes
- Low energy consumption of the core system
- Unique in appearance and design; it's sturdy and durable since the shell is made of high shock-resistance material

### Properties/Specifications:

#### Electrical Parameter

Communication Mode	IEEE 802.15.4 (Zigbee/SmartRoom)
Antenna Type	Internal Antenna
Power Parameter	110V-240V AC
Detection Concentration	400-2000PPM
Alarm Value	1200PPM (Default Value)

#### Structural Parameter

Overall Dimension (Diameter x Thickness)	98x46 (mm)
Material & Color	PC, White
Net Weight	60 (g)
Installation Method	Ceiling/Wall Mounted
Flame Retardant Rating	UL94 V-0
Working Temperature	-10°C ~+45°C
Working Humidity	<=95%RH (Noncondensing)
