

Gas Manipulator

Features:

- Used to turn on/off flammable gas valve automatically when there is gas leakage; highly automated
- When the Gas Detector detects that the gas concentration is higher than the default value, Wireless Automated Manipulator will cut off gas supply automatically to safeguard your life and property.
- Simple installation without wiring
- processing precision; ensures the air tightness and security

Properties/Specifications:

Electrical Parameter

Communication Mode	IEEE 802.15.4 (Zigbee/SmartRoom)
Communication Distance	100m (visible)
Power Super	DC 12V

Structural Parameter

Color	White
Working Temperature	-10°C~+45°C
