

Wall Socket

Overview:

- It can detect the concentration of the particular flammable gas in the air. When the concentration reaches the preset value, the detector will send out alarm signal. Moreover, the detector is equipped with temperature sensor inside for detecting the temperature in the air. When temperature exceeds 65°C, it will send out alert. Also, it can bind with alarm devices and send out wireless signals to activate the alarm when it is triggered.

Features:

- Can be installed directly to all standard wall switch junction box, change the ordinary switch to smart one;
- No wiring, easy to install;
- Able to link with the binding switch, enabling one switch controls multiple devices or multi-switches control one device remotely;
- After installation, connected devices can easily be controlled locally and remotely with smart gateway;
- Timing/Scene/Linkage features can be realized after work with Smart Home App, to show the smart life;
- With delicate and beautiful appearance, the product not only perfectly merges with home improvement, but also brings convenient intelligent life.

Properties/Specifications:

Power Parameter	250V AC, 50Hz
Max Rated Current	13A
Material & Color	PC, White
Flame Retardant Rating	UL94 V-0
Maximum Resistance Load	2500W
Maximum Inductive & Capacitive Load	1500W
